## for vegans Shopify connector

Why could the for vegans Shopify connector be interesting for you?

If you use Shopify as a shop system, there are a number of different advantages that this brings with it.

What the connecto can do: It simplifies the product import, as you will not have to bother with CSV files or even create products manually on the for vegans platform.

Secondly, orders made on the for vegans platform will be automatically synced to your system, this means that for you, it's really business as usual.

One added benefit to this is that ERP systems that you use (such as Billbee for example) will also receive these orders as they are usually coupled with your Shopify shop.

What we are currently working on / upcoming features: We are working on a system that will allow automatic price & inventory updates so you won't have to manually keep track of stock and price actions.

## 1. Creating a shopify app and getting the API credentials

To begin, you will need to create an app in your Shopify dashboard. This app will allow our platform to communicate with your shop via an API.

To do this, head over to "Apps" and click on "Develop apps".

On the next screen, select "Create an app".

This will open a popup where you can then name the app. We suggest calling it "for vegans". Confirm by selecting the bottom button labelled "Create an app".

You will need to enable some of the API permissions. Please make sure to select all the following:

- 1. Customers ▷ write & read
- 2. Inventory ⇒ write & read
- 3. Order editing ⇒ write & read
- 4. Orders ▷ write & read
- 5. Product listings ⇒ write & read
- 6. Products ▷ write & read

You should have **12** selected, please verify that indeed all of the above permissions are enabled, otherwise the app will not be able to communicate with the for vegans platform.

Click on "Save" once you have selected all the appropriate API scopes.

We recommend you copy the API key and the Admin API access token and keep them safe somewhere. Especially the Admin API token will only be shown to you once, for security reasons. The API secret key is not needed for the connector.

**i**. You will need to create another app in case you lose the Admin API key, as it will not be displayed for a second time.

## 2. Connecting the Shopify app to the for vegans platform

To connect the app you just created to the Shopify connector, head over to your vendor dashboard. Under the "Products" tab, you will find the shopify connector. Click on the + icon in the top right corner to begin.

Next, you will need to configure the rest of the connector.

Under "Order Settings", select "stripe | for vegans" and **not** stripe or any other payment processor.

For the Shipping method, select the "fulfilled by..." that corresponds to your company.
